PROFESSIONAL SUMMARY

IT graduate and technical support professional with a strong foundation in systems administration, database management, and software project coordination. Experienced in designing, testing, and managing web-based and LAN-based applications (PHP, MySQL, VB.NET, SQL Server) including security implementations like 2F]. Combines technical troubleshooting expertise with 4+ years of multi-channel client support experience, utilizing automation tools (GoTo Connect AI webchat) and enterprise systems (Kustomer) to drive operational efficiency and digital workflows.

CORE SKILLS

• **Technical & IT Projects:** Project Management, Systems Analysis & Design, Workflow Automation, Database Management (MySQL, SQL Server)

• **Programming & Tools:** PHP, VB.NET, WinForms, GoTo Connect AI Webchat, Kustomer, Google Workspace, Microsoft Office

• **IT Support & Systems:** Technical Troubleshooting, Multi-system Navigation, Root Cause Analysis, Documentation & Reporting

• **Professional Skills:** Problem Solving, Critical Thinking, Client Communication, Process Optimization, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

ConnectOS | SM Megatower, Mandaluyong City | November 2024 - August 2026

Customer Service Representative- Easirent Car Rentals

- Launched and configured an AI-powered webchat automation using GoTo Connect to automate customer interactions and streamline digital touchpoints
- Supported the implementation, testing, and optimization of automated chat workflows based on recurring technical and operational support needs
- Researched account, system reservation, and process concerns; identified technical root causes and coordinated appropriate next steps with internal engineering/operations teams .
- Provided multi-channel technical and operational support across phone, chat, and email while maintaining accurate documentation of system issues and resolutions

IntouchCX | Cyberpark Tower 1, Cubao, Quezon City | April 2022 - October 2024

Customer Service Representative - Turo Car Rentals

- Provided technical and operational user support via phone, chat, and email utilizing enterprise CRM tools like Kustomer
- Managed reservations and general customer inquiries for a US-based car rental company in a fast-paced support environment.
- Investigated platform issues, verified user data, and delivered detail-oriented troubleshooting solutions within fast-paced digital environments.
- Handled company complaints through the Better Business Bureau

SELECTED IT & REPORTING PROJECTS

Project Manager - Web-based POS/Admin Dashboard

- Led project planning, requirements organization, workflow design, testing coordination, and troubleshooting for a PHP/MySQL POS system.
- Engineered secure administrative workflows including login integration, Google Authenticator 2FA, role-based access control, user management, activity logs, and automated backup workflows

Project Manager - Attendance and Payroll System

- Managed scope, process flow, and system architecture requirements for a VB.NET/WinForms and SQL Server/SSMS academic/admin system.
- Developed functional modules covering secure login, employee records management, automated attendance tracking, payroll processing, and reporting dashboards

Project Manager - LAN-based Cafeteria Ordering System

- Coordinated the system design of order processing, payment integration, user-role permissions, audit logs, and reporting workflows
- Implemented solutions utilizing VB.NET/WinForms, SQL Server database tables, and robust client-server process logic

EDUCATION & QUALIFICATIONS

- Bachelor of Science in Information Technology - Datamex College of Saint Adeline, Valenzuela | Graduated April 2026
- 2023 Civil Service Examination Passer - Professional Level
